ABSTRACT

The primary purpose of this annual directory is to list all local agencies providing free public elementary and secondary education in the United States and its outlying areas. Included are agencies that provide general or both general and specialized education, but not those that provide only specialized education. The directory does not include area vocational-technical training systems nor does it include any area school systems that provide only special education. "Local" as used here denotes those agencies closest to the actual operation of the educational programs. Where administrative services are performed for more than one school district by a common superintendent, the resulting supervisory union is listed in addition to the local school districts. The main body of the directory lists, in alphabetical order by state, the following information for each system: name of unit, mailing address, county name, grade span, number of pupils, and number of schools. Also included are summary tables showing: (1) the distribution of operating local public school systems and numbers of pupils by system size; (2) the number of such systems by grade span and size, by grade span and state, and by school system size and state; and (3) the number of operating and nonoperating public school systems by state or other area. FOREWORD

Education Directory, Public School Systems, 1977-78 is one of the Education Division's continuing series of education directories, and provides a current listing of operating local public school systems for the use of the many agencies and organizations dealing with public school systems. It is the only single directory source of statistical data for public school systems in the United States and its outlying areas.

For each of recent years, as a result of reorganizations, annexations, and consolidations, the directory listings have reflected a decrease in the number of local public school systems. Consolidation into larger but fewer school systems appears to offer advantages that compel smaller school systems to consolidate into larger ones; yet, in the last 5 years, the rate of consolidation has declined.

This directory has been prepared by the National Center for Education Statistics, using a computer-operated typesetting process, from information supplied by the States. Each year the preceding year's listing of school systems is sent to the State education agencies for updating. For their excellent cooperation in updating the information contained in the Education Division's file of local public school systems, we are indebted to State education agency research and statistics personnel as well as to members of the Committee on Evaluation and Information Systems of the Council of Chief State School Officers. Special thanks are due to the personnel of these agencies for their early return of the data this year.

David B. Orr, Acting Director
Division of Elementary and
Secondary Education Statistics

Roy C. Nehrt, Chief
Institutional Surveys Branch

ACKNOWLEDGMENT

The National Center for Education Statistics acknowledges the help of Thaddeus Chmura, a computer systems analyst in the Automatic Data Processing Branch of the U.S. Office of Education, who planned and executed most phases of the data-processing operations necessary in the production of this directory.

INTRODUCTION

The primary purpose of this annual directory is to list all local agencies providing free public elementary and secondary education in the United States and its outlying areas. Included are agencies that provide general or both general and specialized education, but not those that provide only specialized education. The directory does not include area vocational-technical training systems nor does it include any area school systems that provide only special education.¹ "Local" as used here denotes those agencies closest to the actual operation of the educational programs. This may include town, district, area, county, or even State agencies (as in Hawaii and parts of Alaska).

For the convenience of users of this publication, one additional level is given in certain cases. Where administrative services are performed for more than one school district by a common superintendent, the resulting supervisory union is listed in addition to the local school districts. For example, in the State of Nebraska the county superintendent provides administrative services to all school districts within his county that have less than seven teachers. These small districts are therefore listed as "county administered systems" under their county superintendent. In the States of Maine, Massachusetts, New Hampshire, and Vermont the local school systems are listed under the supervisory union that provides the respective district with administrative services.

Summary Tables showing the distribution of public school systems by size and by grade span, both nationwide and by State, are presented in the beginning of this publication.

Information for this directory was provided by the research and statistical staff in each State education agency. The instructions and reproduction of the form that were sent to each State are contained in the appendixes.

¹ Special education consists of direct instructional activities designed primarily to deal with the following pupil exceptionalities: (1) physically handicapped; (2) emotionally disturbed; (3) culturally different including compensatory education; (4) mentally retarded; and (5) mentally gifted and talented.

Except for special cases noted below, the following information is given for each system listed: name, mailing address, county, grade span, number of pupils, and number of schools.

1. Nonoperating districts (those not currently operating schools) are shown at the end of each State listing, and only the name and county are given.
2. Grade span, pupil, and school data are not reported for the supervisory unions in Maine, Massachusetts, New Hampshire, and Vermont. However, this information is given for each operating school district within these supervisory unions.
3. Since all school districts in a supervisory union share the same administrative office, the address of this office is given only once for each supervisory union and applies to each school district in the union.

NOTES TO USERS OF THIS DIRECTORY

Name of Unit

- Under each State listing the regular operating school systems are presented first and are followed by the nonoperating districts. Where supervisory unions or county administered systems are included, they and their component districts are listed last.
- Where a nonoperating district is part of a supervisory union, it is placed with its union rather than with the nonoperating districts.
- Within each of the categories noted above, the sequence of entries is alphabetical and, in some instances, numerical according to the name of the unit.
- Information for the outlying areas of the United States is given following the alphabetical listing of States and the District of Columbia.
- In some States, the legal name of a school district may differ from its popular name. The names used here are those suggested by each State Education agency as being the most appropriate identifiers of its districts.

Location of Superintendent

- The mailing address of the administrative office for each operating school system or supervisory union is listed.
- These place names have been reviewed and edited to conform to U.S. Postal Service recommendations as to abbreviation and spelling.
- When a school system located near a State boundary has its post office address in the adjoining State, the abbreviated name of that State is given immediately after the place name.

Zip Code

This code should be considered an integral part of the mailing address.

County Name

County names are shown for operating and nonoperating districts and for supervisory unions. The county given for a school system is the one in which the superintendent's office is located, although some parts of the system may lie in other counties. In the listing for Alaska, election districts rather than counties are given in this column.

Coterminality of Geographical Boundaries

The reader should be aware that school system boundaries often are not coterminous with any other political boundaries. For example, the boundaries of the San Antonio Independent School District in San Antonio, TX, are not coterminous with the city limits but enclose only a portion of the city's area within the city limits. Alamo Heights Independent School District is also mostly within the city limits of San Antonio. Several more school districts cross the city limits and therefore contain areas both within and outside of the city of San Antonio. A similar situation exists in Kansas City, MO, where Kansas City 33, Center 58, North Kansas City 74, and portions of other school systems are within the city limits. Indianapolis, IN, includes all or portions of nine systems. The Los Angeles Unified school system contains areas outside of the city limits of Los Angeles, CA. The above are just a few examples of the lack of coterminality of school system boundaries with other political boundaries.

The Bureau of the Census in the 1972 Census of Governments found that only 3,406 of 17,238 school systems served areas with the same boundaries as those of some other local government. This coterminous group comprised 86 percent of all the dependent school systems (those operated as agencies of other governments) but included only 14 percent of all independent school districts.

In several States, school district boundaries are always coterminous with other political boundaries. Examples are Maryland, Virginia, Florida, West Virginia, and Nevada, where school districts are coterminous with either county or city boundaries.

Grade Span

The entries represent the lowest and highest levels taught in a system, from prekindergarten (PK) through grade 12. However, grades 13 and 14 do

appear in a few school systems that offer vocational education courses, and many operating school systems offer postgraduate (PG) courses. Where information was not available, or where a grade span designation was deemed inapplicable by the respondent, this column is left blank. It is also blank for nonoperating districts and supervisory unions.

Pupils

The figures reported represent average daily membership (ADM) for the school year 1976-77. When this information was not available, other pupil counts were used as follows:

1. Children living within the boundaries of nonoperating districts are counted in the systems in which they attend school.
2. Estimated fall 1977 enrollment is provided for new districts in all States where available. Where such estimates were not available, no entry appears. Fall enrollment is the number of pupils on the rolls on a specific date (usually October 1 or the nearest date thereto when enrollments have stabilized). ADM is the sum of the days present and absent of all pupils when school is in session. Fall enrollment is generally about 1.5 percent higher than ADM for a given year.
3. For New York, the fall 1976 enrollment is shown.
4. The Vermont ADM entries do not include students sent to private schools by local school districts through tuitional agreements with the private schools.
5. The California enrollment entry is the average daily attendance (ADA) for the 1976-77 school year. In California's compilation of ADA, pupils were counted as present if they had a legal excuse for absence on a given day. Therefore, the California ADA entries are roughly comparable to the ADM entries of the other States.
6. The Michigan entry is ADA that was estimated as $0.920 \times$ fall 1976 enrollment.¹
7. The Missouri entry is the 1976-77 ADA.

¹ Michigan derived the factor of 0.920 as the average ratio of ADA to fall enrollment for that State (over a previous three year period).

8. The New Jersey entry is the 1976-77 average daily enrollment.
9. The Trust Territory of the Pacific Islands did not report. The 1972-73 ADM is therefore shown.
10. The Massachusetts entry is fall 1976 enrollment.
11. The Florida entry is fall 1976 enrollment.
12. The Idaho entry is 1976-77 ADA.

Number of Schools

Entries in this column indicate the total number of public elementary and secondary schools in each operating system. This information was not available for a few systems in several States.

Comparability With Other Reports of the Education Division

Since this publication is a directory of school systems, rather than a statistical report, primary attention has been given to the accuracy of names and locations. While the numbers of pupils and schools can be fairly reliable indicators of a school system's size, they should not be construed as official statistics of the Education Division. Official figures in these areas can be found by State in *Statistics of Public Elementary and Secondary Day Schools, Fall 1976*, NCES 77-149.

Mailing to School Systems

The following form of address is suggested for mailing to a school system:

Superintendent of Public Schools
Name of school system
City or town, State, ZIP code

RANKING BY ENROLLMENT OF SCHOOL SYSTEMS
WITH ENROLLMENT OF 10,000 AND MORE
FALL 1977

NOTE.—Asterisks are used when two or more school systems have equal enrollments, and then the highest rank number is assigned to each of these systems.

Rank	Name of unit, city, and State	Pupils 1976-77	Rank	Name of unit, city, and State	Pupils 1976-77
1	New York City, Brooklyn, NY	1,074,851	73	Cobb County, Marietta, GA	50,358

APPENDIXES

- A. Instructions for Completing ELSEGIS X, Part 6, State Report of Operating and Nonoperating Local Public School Systems
- B. Reproduction of NCES Form 2350-B-1, Elementary-Secondary General Information System (ELSEGIS X), Part 6B, Supplementary Report for Newly Organized Local School Systems, School Year 1976-77.

APPENDIX A

INSTRUCTIONS FOR COMPLETING ELSEGIS X, PART 6 STATE REPORT OF OPERATING AND NONOPERATING LOCAL PUBLIC SCHOOL SYSTEMS

COVERAGE

This survey is intended to include all local agencies providing free public elementary and secondary education in the United States and its outlying areas. Such education is considered here to be all education through grade 12. "Local" as used here denotes those agencies having direct responsibility for the education of children residing within designated geopolitical boundaries. This may include town, district, area, county, or even in some cases State agencies (as in Hawaii and parts of Alaska). Also included are public agencies providing special or vocational/technical education on a regional basis such as area vocational/technical agencies.

INSTRUCTIONS FOR UPDATING PART 6-A (THE PRIOR YEAR'S UNIVERSE)*

Local school systems as reported in fall 1976 are listed by State, county, and name of school system on Part 6-A.

1. For routine corrections of information printed on the listing, draw a red line through the erroneous information and enter the correction in red above the line.
2. For corrections necessitated by school system consolidations, see instructions for completing Part 6-B that follow.

* See sample listing following these instructions.

3. If the name of the school system as listed is not the best identifier for general purposes, please correct. However, the name must be contained within 30 characters, including spaces between words.
4. The name of the city listed should be that of the city or postoffice where the superintendent of schools receives mail. Maximum field length is 13 characters. Longer names should be abbreviated per the *ZIP Code Abbreviations for Use with ZIP Code*, POD Publication #59 (Rev.).
5. The ZIP code should be verified and corrected, if necessary.
6. The county name listed should identify the county where the superintendent of school's office is located, even though the school system may include areas in more than one county. This name should be verified and corrected, if necessary.
7. The number of schools operated by each school system in 1976-77 is listed. The number of schools which the school system expects to operate in 1977-78 should be entered, if different from the number listed.
8. The grade span of pupils served in 1976-77 is listed. If the grade span for 1977-78 is to be changed, please enter the correction. The first two positions in the field indicate the lowest grade and the last two the highest grade. Besides grade numbers (01, 02, etc.) the symbols K for kindergarten and PK for prekindergarten have been used. If the school system enrolls postgraduate pupils (pupils who have graduated from the 12th grade, but are taking regular secondary school courses, NOT 13th or 14th graders) the symbol PG may be used for highest grade.
9. Verify or correct the OP CD (operating code) for each system according to the following coding structure:

Code 1 — Operating system. A self-contained local public school system: having its own decisionmaking board of control, operating a school or schools providing general elementary/secondary education, including vocational/technical education.

Code 2 – Nonoperating system. A self-contained local public school system having its own decisionmaking board of control that does not operate schools, but pays tuition to other operating systems for the education of children residing within its boundaries.

Code 3 – Supervisory Union. An administrative agency that provides services to component school systems (found only in Maine, Massachusetts, New Hampshire, Vermont, and Nebraska).

Code 4 – An operating system that is a component of a supervisory union.

Code 5 – A nonoperating system that is a component of a supervisory union.

Code 6 – A public agency providing general elementary and/or secondary education not included in the above categories, such as an area vocational/technical school system, special education school system, etc., which are not considered to be local school systems as defined in code 1. If any such school systems were listed in operating codes 1 through 5, please change the code to operating code 6. If any school systems operate within the State that are properly classified in this way and do not appear on the B-1A list, their names and complete information (except State/System Number) should be added to the end of the B-1A list.

10. The supervisory union code for component school systems is listed for those States that have supervisory unions. These codes should be verified and corrected, if necessary.
11. Enter the average daily membership for the 1976-77 school year under ADM. If not available, please estimate. Please do not use decimals, but round to the nearest whole number.
12. Enter the average daily attendance for the 1976-77 school year under ADA. If not available, please estimate. Please do not use decimals, but round to the nearest whole number.

13. Verify or correct the fiscal status code for each school system according to the following coding structure:

Code 1 – Fiscally independent. The local school board has complete control over its fiscal affairs as provided by State school laws and regulations, e.g., the budget and tax rate are not subject to review and/or change by any other governmental agency other than the State and Federal governments.

Code 2 – Fiscally dependent. Some other governmental agency or official, e.g., city council, county board of supervisors, mayor, etc., exercises final control over the school board's budget, tax rate, etc. Do not consider controls of State and Federal governments.

Code 3 – Fiscally independent for current expenditures, but dependent for capital outlay, debt service.

14. School board selection code should be verified or corrected according to the following coding structure:

Code 1 – School board is elected by popular vote.

Code 2 – School board is appointed by some governmental agency or official, e.g., city council, county board of supervisors, mayor, etc.

Code 3 – Part of the school board is appointed and part of it is elected.

INSTRUCTIONS FOR COMPLETING PART 6-B

A Part 6-B form must be completed for each newly organized school system resulting from reorganization, consolidation, annexation, etc., occurring during the last year.

Three types of consolidations appear possible: (1) a group of school systems consolidate into a single school system; (2) a group of school systems consolidate into two or more school systems wherein one or more of the original school systems are divided as a result of the consolidation; and (3) a single school system is divided into two or more school systems.

1. In the first situation, complete section I for the newly organized school system. Enter the correct name, even though it may be the

same name as one of the systems involved in the consolidation. Enter the city/post office name, ZIP, and county name where the superintendent's office is located. Enter the combined number of schools that the newly organized system now operates (the sum of the schools operated by the original systems minus any schools that may have been closed). Enter the grade span of pupils served, the operating code (usually "1"), and the supervisory union code, if in New England. Enter the end-of-year combined ADM and ADA for the newly organized system for the 1976-77 school year. Enter the fiscal and board selection codes.

Copy the ST/SYSTEM NUMBER, name of system, city, ZIP, and county name from the 6-A list for each of the systems consolidated into this newly organized system into the spaces provided in section II. *Circle the ST/SYSTEM NUMBER on the 6-A list for each such school system entered into section II.*

2. In the second situation, two 6-B forms must be made up. Follow the instructions in paragraph 1 above for completing section I for each of the two newly organized systems, except that the "number of schools," ADA and ADM must somehow be split out for the system(s) that were divided by the consolidation.

Follow the instructions for completing section II above, except that the name(s) of the system(s) that were divided must appear on each of the forms for the two newly organized systems.

Circle the ST/SYSTEM NUMBER on the 6-A list for each school system entered into section II.

3. In the third situation, a 6-B form must be prepared for each newly organized school system according to the instructions given above, except that the name of the original system that was divided must be entered on section II of each of the 6-B forms. Be sure to circle the ST/SYSTEM NUMBER on the 6-A list for the system that was divided.
